

WOODWORKING PROFILE

“People love chopping wood. In this activity, one immediately sees results”.

-Albert Einstein-

Woodworking is the art or craft that focuses on creating or fashioning objects out of wood. The materials can range from a rudimentary bench to intricate pieces of furniture.

The Woodworking Profile will enable students to acquire the knowledge, skills and attitude essential to perform woodworking tasks. Students will learn how to manipulate and transform wood, as well as other materials. Through progressive hands-on activities students will develop their craftsmanship and study the different stages involved in the creation process. Students will be taught how to handle and use specific tools in a safe manner. Woodworking requires a lot of patience, creativity and dexterity and can sometimes be a physically challenging activity.

Students will be expected to frequently reflect upon their learning so that they become able to recognize their strengths and limitations, and to expand their abilities.

Students will work together with one goal in mind: **to be able create a small project from start to finish.**

A passion for hands-on work is important for students interested in this profile.

Additional material may be required.

Where: At St. Patrick’s High School

Transportation: N/A

When: 4 times per 10-day cycle from 8:40 a.m. to 10:15 a.m.

Maximum of 12 students (Cycle 1)
